CAREER OBJECTIVE

Detail-oriented and performance-driven Full-Stack Developer with solid expertise in the React, Node.js, and .NET Core ecosystems. Proven experience in designing highly interactive UI/UX, integrating AI microservices (Google Gemini API), and building scalable database structures. Seeking a position in a dynamic technology environment to leverage my system optimization skills, expand software architecture knowledge, and transition into a Senior role within the next 3 years.

CERTIFICATES & AWARDS

- Microsoft Office Specialist Word — Issued: 09/2022
- NIE's Certificate: B2 English

WORK EXPERIENCE

VU KHOA TRADING AND SERVICE CO., LTD

06/2025 – 11/2025

Full-Stack Developer Intern

- Collaborated in building **NeoBoard**, a SaaS Enterprise Asset Management System, implementing a **.NET 9 Web API** with **Clean Architecture**.
- Designed database schemas using **EF Core** and **MySQL**, applying the Repository and Unit of Work patterns for clean data access.
- Developed a **real-time tracking dashboard** utilizing **SignalR** to track live asset status updates.
- Built a mobile-responsive **self-service QR-code borrowing flow** with camera/selfie verification for automated checkout.
- Implemented an **automated proactive maintenance scheduler** using background worker services based on equipment health.
- Managed frontend state using **Zustand** and handled asynchronous server state using **React Query**, securing endpoints with JWT.

RECENT PROJECTS

NEXUS-ECOM: AI-POWERED APPLE E-COMMERCE & IT SERVICE HUB

10/2025 – 01/2026

Stack: React (Vite), Redux Toolkit, Framer Motion, Node.js (Express), MongoDB (Mongoose), Socket.io, Google Gemini API, Docker.

- Architected a high-performance Apple e-commerce and IT Service Hub ecosystem, utilizing the **MERN** stack and **Redux Toolkit** for robust state management.
- Engineered an intelligent, multi-agent AI assistant utilizing the **Google Gemini API**, implementing advanced prompt engineering to automate sales support and deliver personalized recommendations.
- Built a custom **AI Hub management dashboard** allowing administrators to dynamically switch models (e.g. `gemini-2.0-flash`, `gemini-flash-latest`) and update system instructions in real time.
- Developed secure RESTful APIs with **Role-Based Access Control (RBAC)**, Google OAuth, Firebase Admin, and secure JWT-based token rotation, sanitized to prevent NoSQL injection.
- Implemented real-time bidirectional communication using **Socket.io** for expert-to-customer consultation and hardware repair ticketing.

NEOBOARD: SAAS ENTERPRISE ASSET MANAGEMENT SYSTEM

03/2026 – Present

Stack: React 19 (Vite), Zustand, React Query, Tailwind CSS, .NET 9 (ASP.NET Core), MySQL, Entity Framework Core, SignalR, JWT.

- Designed and built an Enterprise Asset Management System (EAMS) leveraging **.NET 9 (Clean Architecture)** and **React 19 (Vite)** to track educational and corporate asset lifecycles.
- Structured the database with **MySQL** and **EF Core**, implementing the Repository and Unit of Work patterns for modularity, clean separation of concerns, and optimized query execution.
- Developed a **real-time dashboard** and notifications utilizing **SignalR** to track live asset statuses (Available, In Use, Maintenance, Broken).
- Built an **automated proactive maintenance scheduler** using background worker tasks to automatically generate maintenance tickets based on equipment health metrics (e.g. battery cycles).
- Created a mobile-responsive **self-service QR-code borrowing flow** enabling students to check out assets in under 30 seconds with photo/selfie verification.
- Configured centralized error handling, session expiration logic, and camelCase JSON formatting using custom **Axios Interceptors** on the React frontend.

DEVELOPER PORTFOLIO: PERSONAL SHOWCASE

05/2026 – Present

Stack: React 18, Vite, Tailwind CSS, Lucide Icons.

- Built a responsive showcase featuring interactive project filters, scroll animations, and a contact system.
- Integrated a backend-connected recruiter testimonial feedback form.
